Makes precision irrigation possible

## GroSens HandHeld meter downloader program

In order to download measurement files to your computer you need to install a small program called GroSens Downloader on your PC.

This program will automatically install on your computer if you click on the link below (hold the ctrl key and click on the link).

<http://software.decagon.com/grosens/GrosensDownloaderInstaller-v1.0.192.exe>

Please follow the instructions during the installation process. The program will install an Icon for this program on your desktop. When clicking on this Icon the program will start.

Below you find a screenshot on what the program looks like.

When you connect the reader to your PC with the USB cable and start up the GroSens Downloader program, by pushing on download, data will be downloaded to your PC. Data will be stored as excel files and can be opened in Excel. More information can be found in the GroSens HandHeld manual (can be downloaded at [www.grodan.com/GroSens](http://www.grodan.com/GroSens)).
